

Critical Information Summary

CipherTel Fibre Internet Service Kingston 10B

Information about the Service

CipherTel Fibre is a high speed internet service that provides access, over the Kingston Fibre Network to the internet and related services, such as email. The service is designed to provide an 'always on' or constant connection to the internet.

CipherTel Fibre uses the latest fibre delivery technology and has been extensively tested and deployed throughout USA and Europe with outstanding internet, phone and digital TV delivery results.

This service is capable of delivering high speed seamless internet with future speeds to the home in excess of 100mbps. The system also carries your high definition television and available channels will continue to expand as more free to air digital TV channels become available.

You may also choose to add phone line services to this network, for further information on phone services to your home please contact CipherTel.

Please note,

- A conventional fixed phone line is not required for connection of the Kingston Fibre Network for internet or phone services.
- The service will not work in the event of a power outage.

Requirements & Availability

Connection to the Kingston Fibre Network is available only to residents located in Kingston Estate release 10B.

You will require a fibre lead-in and fibre modem to be installed at your premise before your internet service can be connected and activated.

If multiple Ethernet or wireless Ethernet devices are to connect to the internet you will require an Ethernet router or wireless Ethernet router. If you don't already have a router or wireless access point, CipherTel can supply a Wireless Router (Netgear WNR2000) Pre-programmed ready for use at a reasonable additional cost, which will allow connections to Wi-Fi enabled devices such as ipads, smartphones, laptops etc.

Minimum Term

Kingston Fibre plans are available on either 12 month or 24 month terms.
